

# NORDPLUS PROJECT IN LITHUANIA

KATE BRIKMANE-BUKLOVSKA 6.A CLASS

## OCTOBER 13

We arrived in Garlava at the hosting families while we are in Lithuania.

I was hosted by a girl named Radville with her family.

Before we had gone there, I had already called her and talked to her. On the first evening, we watched the TV and talked about school, life, and all sorts of things.

## OCTOBER 14

- In the morning, Radville and I went to school where we all had to meet. When we were all here, we made small cartoons of clay.
- After this, we went to draw with charcoal. Of course all the hands became black but mine were the blackest 😊.
- Then we ate lunch and went to town with public transport. We walked across the bridge which was very beautiful, and we headed to Vytautas Magnus University where we learned how to work in a recording studio. Then we went to the Acropolis and then back to the families. When we were back I and Radville walked through Garlava (the town where we stayed that week).

## OCTOBER 15

■ I again arrived at school faster than others but when everyone came, we had an English lesson where we learned about Lithuanian national dishes. We tasted the bread and it was amazing. When I ate the bread with jam, I had a feeling that I was on the countryside on a sunny Sunday morning. Then we could make our own bread, which was very cool and interesting. When our bread was finished, it came out very good and I really enjoyed it. Then we ate lunch and went to the company Devbridge. After that we went to the Žalgiris Arena. It was amazing there. The Žalgiris Arena has the largest screen in the Baltic states. We were taken to places where others can't usually go and that was very cool. After that we went home.

## OCTOBER 16

- We went to Vilnius where we could spend an hour in the center of Vilnius. I, the teacher, Mare, Rasa, and Oliver we visited the great tower and went to the church.
- After the rest we went to the Civilian training center. It was very cool and interesting there. Then we ate our lunch and went to the president's palace. There I thought that I saw the Lithuanian president, but it was just a security guard.
- After the president's palace we went to the money museum. There I and others found out what money is in Africa and the rest of the world.

## OCTOBER 17

- In the morning we had a geography lesson for European countries. Then we walked in Garlava but I knew almost everything in it. We went to the church and it was beautiful there. After that, at school we made handmade paper and they turned out lovely. Then we ate lunch and headed to Lazer tag. Our team won the game 😊. That evening, me and Radville's class went to the Žalgiris Arena basketball game and the Lithuanian team won the game 😊

---

## OCTOBER 18

■ In the morning, we presented our schools. The other presentations were perfect. I was sad that we would have to leave this beautiful city, but I also missed my family. My hosting family as a farewell gift gave me a chocolate pizza. They were very nice. Then we went to the chocolate Museum and workshop Ruta and there was very tasty chocolate but after that we went home.

■

## THE END

■ Every day was full of adventures and learning. At the end of the project i have gotten new friends, new memories and have learned a lot of new and interesting things

F.R.I.E.N.D.S

*Memories*
